Flightaware Summer Internship Program Apply Online 2026

Description

Flightaware offers diverse internship opportunities across various departments, allowing you to explore potential career paths in areas like:

- **Software Engineering:** Assist with developing and maintaining web and mobile applications, data pipelines, and machine learning models.
- **Data Science & Analytics:** Analyze flight data to uncover trends, generate insights, and improve flight tracking accuracy.
- **Marketing & Communications:** Support social media engagement, content creation, and public relations initiatives.
- **Sales & Business Development:** Research potential partner opportunities, prepare sales presentations, and assist with customer relationship management.
- **Product Management:** Contribute to product development, user research, and testing within the aviation technology field.

Responsibilities

Specific responsibilities will vary depending on your chosen placement, but may include:

Conducting research and analysis using relevant tools and datasets.
Assisting with project development, implementation, and testing.
Creating reports, presentations, and other communication materials.
Participating in meetings, brainstorming sessions, and industry events.
Learning and applying industry-specific software and technologies.
Collaborating with diverse teams of professionals across departments.

Qualifications

- Currently enrolled as a college student pursuing a relevant degree in engineering, computer science, data science, business, marketing, or a related field.
- Minimum GPA of 3.0 (may vary depending on specific program).
- Strong analytical, problem-solving, and research skills.
- Excellent communication, interpersonal, and teamwork skills.
- Ability to work independently and take initiative.
- Proficient in Microsoft Office Suite and basic computer programming skills (may vary depending on placement).
- Demonstrated interest in aviation technology and a desire to learn are key.

Experience

- Prior experience in relevant coursework, research projects, or related internships is preferred, but not required.
